No part of this publication may be reproduced or transmitted in any form or by any means, electronic or mechanical, including photocopy, recording, or any information storage and retrieval system, without permission in writing from the copyright owner.

The appearance of the code at the bottom of the first page of an article in this journal indicates the copyright owner's consent that copies of the article may be made for personal or internal use, or for the personal or internal use of specific clients. This consent is given on the condition, however, that the copier pay the stated per copy fee through the Copyright Clearance Center, Inc. (27 Congress Street, Salem, Massachusetts 01970), for copying beyond that permitted by Sections 107 or 108 of the U. S. Copyright Law. This consent does not extend to other kinds of copying, such as copying for general distribution, for advertising or promotional purposes, for creating new collective works, or for resale. Copy fees for pre-1988 articles are as shown on the article title pages; if no fee code appears on the title page, the copy fee is the same as for current articles.

CONTENTS OF VOLUME 261

NUMBER 1, FEBRUARY 15, 1988

COMMUNICATION

Directed Mutagenesis of the Dicyclohexylcarbodiimide-Reactive Carboxyl Residues in β-Subunit of F_1-ATPase of *Escherichia coli*
Derek Parsonage, Susan Wilke-Mounts, and Alan E. Senior 222

BIOLOGICAL OXIDATIONS AND BIOENERGETICS

Characterization of Glutathione-Dependent Inhibition of Lipid Peroxidation of Isolated Rat Liver Nuclei *M. A. Tirmenstein and D. J. Reed* 1

Superoxide Dismutase Induces Differentiation in Microplasmodia of the Slime Mold *Physarum polycephalum*
R. G. Allen, Arthur K. Balin, R. J. Reimer, R. S. Sohal, and Claude Nations 205

ENZYME MECHANISMS AND METABOLISM AND COENZYMES

Effects of Alcohols on the Reactivity and Stability of *Azotobacter vinelandii* Hydrogenase *Daniel J. Arp* 35

LIPIDS AND PROSTAGLANDINS

NADPH-Dependent Microsomal Metabolism of 14,15-Epoxyeicosatrienoic Acid to Diepoxides and Epoxyalcohols
Jorge H. Capdevila, Paul Mosset, Pendri Yadagiri, Sun Lumin, and J. R. Falck 122

MEMBRANE TRANSPORT AND INTRACELLULAR SIGNALS

Multiwavelength Method for Measuring Concentration of Free Cytosolic Calcium Using the Fluorescent Probe indo-1
Eugene G. Popov, Ilya Yu. Gavrilov, Eugene Ya. Pozin, and Zufar A. Gabbasov 91

MEMBRANES, CELL SURFACES, AND RECEPTORS

Single Chloride Channels in Cultured Rat Neurones
Fabio Franciolini and Anna Petris 97

Purification of Membranes and Identification of Phase-Specific Proteins of the Dimorphic Pathogenic Fungus *Histoplasma capsulatum*
B. Vijaya Kumar and Bruno Maresca 212

OXYGENASES, MICROSOMES, AND *P*-450 REACTIONS

The Role of Iron Chelates on the Selectivity of Fenton Reagent in Hydroxylation, N-Demethylation, and Sulfoxidation of Cimetidine: A Novel Biomimetic Model for the Regioselectivity of Cytochrome *P*-450
Shmuel Zbaida, Rami Kariv, and Paula Fischer 12

Modification of Trypsin-Solubilized Cytochrome b_5, Apocytochrome b_5, and Liposome-Bound Cytochrome b_5 by Diethylpyrocarbonate
Krystyna Konopka and Lucy Waskell 55

Purification and Characterization of Tryptophan Dioxygenase from *Streptomyces parvulus* *Michael J. M. Hitchcock and Edward Katz* 148
Regioselective Hydroxylation of Prostaglandins by Constitutive Forms of Cytochrome *P*-450 from Rat Liver: Formation of a Novel Metabolite by a Female-Specific *P*-450 *David Kupfer, Ingela Jansson, Leonard V. Favreau, Anthony D. Theoharides, and John B. Schenkman* 186

PHYSICAL BIOCHEMISTRY, MACROMOLECULAR STRUCTURE AND FUNCTION

Excitation Energy Transfer Study of the Spatial Relationship between the Carbonyl and Metal Cofactors in Pig Plasma Amine Oxidase *Mark S. Lamkin, Taffy J. Williams, and Michael C. Falk* 72

PLANT MOLECULAR BIOLOGY, BIOCHEMISTRY, AND PHOTOSYNTHESIS

A Homolog of Ribulose Bisphosphate Carboxylase/Oxygenase-Binding Protein in *Chromatium vinosum* *Jose A. Torres-Ruiz and Bruce A. McFadden* 196

PROTEIN STRUCTURE AND FUNCTION

Calcium-Dependent Translocation of Calbindin-D_{28k} from Intestine to Blood *Y. S. Lee, T. J. Reimers, R. G. Cowan, C. S. Fullmer, and R. H. Wasserman* 27
Purification of a Peptidylglycine α-Amidating Enzyme from Transplantable Rat Medullary Thyroid Carcinomas *Nozer M. Mehta, James P. Gilligan, Barry N. Jones, Arthur H. Bertelsen, Bernard A. Roos, and Roger S. Birnbaum* 44
Stability of aprA-Subtilisin in Sodium Dodecyl Sulfate *Linda Owers Narhi, Mark Zukowski, and Tsutomu Arakawa* 161
Circular Dichroism of Platelet Factor 4 *German B. Villanueva, Nancy Allen, and Daniel Walz* 170

PROTEIN TURNOVER, PROTEOLYSIS, AND POST-TRANSLATIONAL PROCESSING

Identification of Latent Procathepsins B and L in Microsomal Lumen: Characterization of Enzymatic Activation and Proteolytic Processing *in Vitro* *Yukio Nishimura, Takahiro Kawabata, and Keitaro Kato* 64
Proteases of the Nematode *Caenorhabditis elegans* *Gary J. Sarkis, Michael R. Kurpiewski, James D. Ashcom, Linda Jen-Jacobson, and Lewis A. Jacobson* 80
Ca^{2+}-Dependent Proteolysis of the Ah Receptor *Alan Poland and Edward Glover* 103
The Binding of Divalent Metal Ions to Platelet Factor XIII Modulates Its Proteolysis by Trypsin and Thrombin *Ann Mary, Komandoor E. Achyuthan, and Charles S. Greenberg* 112

REGULATION OF METABOLISM AND OF ENZYME ACTION

Hexose Metabolism in Pancreatic Islets: Metabolic and Secretory Responses to D-Fructose *Abdullah Sener and Willy J. Malaisse* 16
Inhibition of Adenylate Cyclase from Luteinized Rat Ovary by Monovalent Cations: Roles of the Stimulatory Guanine Nucleotide-Binding Regulatory Component and Stimulatory Hormone Receptor *Lata R. Joshi, Sarah R. Boland, Erik L. Hewlett, and Michael S. Katz* 134

me Insulinomimetic Effects of the Polar Head Group of an Insulin-Sensitive Glycophospholipid on Pyruvate Dehydrogenase in Both Subcellular and Whole Cell Assays *W. Kirby Gottschalk and Leonard Jarett* 175

NUMBER 2, MARCH 1988

COMMUNICATION

NAD(P)H-Dependent 6′-Deoxychalcone Synthase Activity in *Glycyrrhiza echinata* Cells Induced by Yeast Extract
Shin-ichi Ayabe, Akihiro Udagawa, and Tsutomu Furuya 458

BIOLOGICAL OXIDATIONS AND BIOENERGETICS

Oxygen Radical-Mediated Lipid Peroxidation and Inhibition of Ca^{2+}-ATPase Activity of Cardiac Sarcoplasmic Reticulum
Rakesh C. Kukreja, Eiichiro Okabe, Gayle M. Schrier, and Michael L. Hess 447

ENZYME MECHANISMS AND METABOLISM AND COENZYMES

Purification and Preliminary Characterization of a Monomeric Glutathione *S*-Transferase from *Tetrahymena thermophila*
Julie M. Overbaugh, Edward P. Lau, Vincent A. Marino, and Ray Fall 227
The Kinetic Mechanism of Human Placental Aldose Reductase and Aldehyde Reductase II
Aruni Bhatnagar, Ballabh Das, Sandhya R. Gavva, Paul F. Cook, and Satish K. Srivastava 264
Identification of the Active-Site Serine in Human Lecithin: Cholesterol Acyltransferase
Jamal Z. Farooqui, Robert C. Wohl, Ferenc J. Kézdy, and Angelo M. Scanu 330
Role of Divalent Metals in the Kinetic Mechanism of Insulin Receptor Tyrosine Kinase *Pasquale P. Vicario, Richard Saperstein, and Alfred Bennun* 336

HORMONE STRUCTURE AND FUNCTION

Regulation of the Intestinal 1,25-Dihydroxyvitamin D_3 Receptor during Neonatal Development in the Rat *E. A. Pierce and H. F. DeLuca* 241

LIPIDS AND PROSTAGLANDINS

Inhibitors of Cytochrome *P*-450-Dependent Arachidonic Acid Metabolism
Jorge Capdevila, Lionel Gil, Miriam Orellana, Lawrence J. Marnett, J. Ian Mason, Pendri Yadagiri, and J. R. Falck 257
Triacylglycerol Lipase-Mediated Release of Arachidonic Acid for Renal Medullary Prostaglandin Synthesis
Yohko Fujimoto, Kazuyuki Nishioka, Yukari Hase, Kiyomi Sado, and Tadashi Fujita 368
Isolation and Characterization of a Fatty Acyl Esterase from Rat Lung
Alakananda Basu, Robert H. Glew, Rhobert W. Evans, and George Bandik 384
Micellization of Fatty Acyl-CoA Mixtures and Its Relevance to the Fatty Acyl Selectivity of Acyltransferases
Panayiotis P. Constantinides and Joseph M. Steim 430

MEMBRANE TRANSPORT AND INTRACELLULAR SIGNALS

Two Phosphorylated Forms of Myosin in Thrombin-Stimulated Platelets
Michiko Naka, Masahiro Saitoh, and Hiroyoshi Hidaka 235

Calcium Binding Proteins of Junctional Sarcoplasmic Reticulum: Detection by ^{45}Ca Ligand Overlay *Francesco Zorzato and Pompeo Volpe* 324

How a Soluble Enzyme Can Be Forced to Work as a Transport System: Description of an Experimental Design
Jean-Claude Vincent, Stephane Alexandre, and Michel Thellier 405

MEMBRANES, CELL SURFACES, AND RECEPTORS

Stimulation of Arachidonic Acid Release by Guanine Nucleotide in Saponin-Permeabilized Neutrophils: Evidence for Involvement of GTP-Binding Protein in Phospholipase A_2 Activation
Shigeru Nakashima, Koh-ichi Nagata, Kiyo Ueeda, and Yoshinori Nozawa 375

Reconstitution of Fusogenic Sendai Virus Envelopes by the Use of the Detergent Chaps
Sophia Ran, Ofer Nussbaum, Abraham Loyter, Yehuda Marikovsky, and Benjamin Rivnay 437

MOLECULAR BIOLOGY, GENE EXPRESSION, AND DEVELOPMENTAL BIOCHEMISTRY

Effect of Various Polyamine Analogs on *in Vitro* Polypeptide Synthesis
Tomohito Kakegawa, Keiko Takamiya, Tatsuhiro Ogawa, Yumiko Hayashi, Seiyu Hirose, Masaru Niitsu, Keijiro Samejima, and Kazuei Igarashi 250

The Effect of Sodium Butyrate on Tyrosine Aminotransferase Induction in Primary Cultures of Normal Adult Rat Hepatocytes
Jeffrey L. Staecker and Henry C. Pitot 291

Functional Dissection of Nuclear Envelope mRNA Translocation System: Effects of Phorbol Ester and a Monoclonal Antibody Recognizing Cytoskeletal Structures
Heinz C. Schröder, Bärbel Diehl-Seifert, Michael Rottmann, Rudolf Messer, Beverley A. Bryson, Paul S. Agutter, and Werner E. G. Müller 394

OXYGENASES, MICROSOMES, AND *P*-450 REACTIONS

Role of Electrostatic Interactions in the Reaction of NADPH–Cytochrome *P*-450 Reductase with Cytochromes *P*-450
Steven G. Nadler and Henry W. Strobel 418

PHYSICAL BIOCHEMISTRY, MACROMOLECULAR STRUCTURE AND FUNCTION

Effects of Crosslinking on the Thermal Stability of Hemoglobins. II. The Stabilization of Met-, Cyanomet-, and Carbonmonoxyhemoglobins A and S with Bis(3,5-dibromosalicyl) Fumarate *Thao Yang and Kenneth W. Olsen* 283

PLANT MOLECULAR BIOLOGY, BIOCHEMISTRY, AND PHOTOSYNTHESIS

Partial Purification and Characterization of Two Sesquiterpene Cyclases from Sage (*Salvia officinalis*) Which Catalyze the Respective Conversion of Farnesyl Pyrophosphate to Humulene and Caryophyllene
Shangara S. Dehal and Rodney Croteau 346

notosynthesis in Phospho*enol*pyruvate Carboxykinase-Type C_4 Plants: Activity and Role of Mitochondria in Bundle Sheath Cells
M. D. Hatch, A. Agostino, and J. N. Burnell 357
Light/Dark Regulation of Maize Leaf Phospho*enol*pyruvate Carboxylase by *in Vivo* Phosphorylation *Jin-An Jiao and Raymond Chollet* 409

PROTEIN STRUCTURE AND FUNCTION

Active-Site Heterogeneity in *Limulus* Hemocyanin as Revealed by Reaction with Peroxides
Richard W. Topham, Shirley Tesh, Celia Bonaventura, and Joseph Bonaventura 299

REGULATION OF METABOLISM AND OF ENZYME ACTION

Phosphorylation of Glucokinase from Rat Liver *in Vitro* by Protein Kinase A with a Concomitant Decrease of Its Activity *Pia Ekman and Ewa Nilsson* 275
The Effectiveness of Inhibitors of Soluble Prolyl Hydroxylase against the Enzyme in the Cisternae of Isolated Bone Microsomes
Georg Tschank, Hartmut M. Hanauske-Abel, and Beverly Peterkofsky 312

AUTHOR INDEX FOR VOLUME 261 463

The Subject Index for Volume 261 will appear in the December 1988 issue as part of a cumulative index for the year 1988.

Instructions to Authors[1]

Archives of Biochemistry and Biophysics is an international journal dedicated to the dissemination of fundamental knowledge in all areas of biochemistry and biophysics. **Short Communications** and **regular manuscripts** that contain new and significant information of general interest to workers in these fields are welcome. Sufficient detail must be included to enable others to repeat the work.

Short Communications offer a means of early publication of work of such importance that rapid publication is warranted. They should not exceed 15 double-spaced typed manuscript pages in length (including text, bibliography, tables, and figures). To expedite review and processing of communications, authors may send them directly to an Executive Editor most closely associated with the subject category of the communication. Communications sent to the Editorial Offices of the journal (see below) will be assigned to an Executive Editor.

Manuscripts should be written in clear, concise, and grammatical English and should be submitted in quadruplicate (one original and three photocopies), including four sets of original figures or good quality glossy prints, to:

Archives of Biochemistry and Biophysics
Editorial Office
Seventh Floor
1250 Sixth Avenue
San Diego, California 92101

Failure to receive the required number of copies of the manuscript may delay review. All copies of halftone artwork *must* be glossy prints or originals; photocopies of halftones do not show sufficient detail to be used for the review process. Gene sequences should be simultaneously submitted to a gene databank. *In the case of rejected manuscripts only one copy of the manuscript will be returned to the author.*

Original papers only will be considered. ***Manuscripts are accepted for review with the understanding that the same work has not been published, that it is not under consideration for publication elsewhere, and that its submission for publication has been approved by all of the authors and by the institution where the work was carried out. It is the responsibility of the corresponding author to obtain the agreement of all the coauthors of the manuscript prior to its submission to the journal.*** Abstracts of oral or poster presentations are not considered to constitute previous publication. Presentation of material in preliminary communications normally will not preclude publication of a full paper in *Archives*, provided that the full paper contains additional information that justifies its publication and does not repeat the presentation of the same data that supported the preliminary communication. The manuscript should be accompanied by copies of all preliminary communications and of all relevant manuscripts that are in press or under editorial consideration by another journal. Authors must verify the wording of any cited personal communication with the persons who supplied the information and obtain approval for the use of their names in connection with the quoted information or for the citation of unpublished work; written evidence of such approval should accompany the manuscript. All material published in *Archives* represents the opinions of the authors and should not be construed to reflect the opinions of the Editors or the Publisher.

Authors should suggest competent reviewers in their field and may also suggest individuals whom they wish to have excluded from the review process. The corresponding author will receive a decision letter from the Executive Editor. Revised manuscripts and correspondence concerning such manuscripts should be sent to the Executive Editor at the address indicated on the decision letter. Revised manuscripts should be accompanied by a copy of the unrevised version.

Many acceptable papers require minor revision or condensation. It is in the mutual interest of both the authors and the journal that amended manuscripts be returned promptly. A revised paper will retain its original date of receipt only if it is received by the Executive Editor within 2 months of the date of return to the author.

Authors submitting a manuscript do so on the understanding that if it is accepted for publication, copyright in the article, including the right to reproduce the article in all forms and media, shall be assigned exclusively to the Publisher. The Publisher will not refuse any reasonable request by the author for permission to reproduce any of his or her contributions to the journal.

Communications offer a means of early publication of work of such importance that rapid release is warranted. Normally they should not exceed 15 manuscript pages in length (including text, bibliography, tables, and figures). The review and printing of such papers will be expedited to provide earliest possible publication.

Form of Manuscript. Manuscripts should be typewritten and double-spaced throughout on one side of 8.5 × 11-in. white paper, with 1-in. margins on all sides. All pages should be numbered consecutively.

Subject Areas. Authors should specify on page 1 of the manuscript the Subject Area of the article submitted. See the back cover for the listing of the Subject Areas.

---

[1] An extended Instructions to Authors is published in the January issue of *Archives of Biochemistry and Biophysics*. Reprints are available from the Editorial Office upon request. Authors should consult the extended Instructions for details on nomenclature, IUPAC–IUB rules and recommendations, and accepted abbreviations.

Page 1 should contain the article title, author(s), affiliation(s), a short running title (abbreviated form of title) of less than 65 characters including letters and spaces, the appropriate subject category for listing in the Table of Contents, suggestions for index list entries, and the name and complete mailing address (and telephone number if possible) of the person to whom correspondence should be sent.

Page 2 should contain a short abstract of 50–250 words.

Editorial style should conform to the *Handbook for Authors* (American Chemical Society).

Footnotes to the text should be identified by superscript Arabic numerals and should be typed double-spaced on a separate sheet: footnotes to tables should be identified by superscript lowercase italic letters (^{a,b}, etc.) and placed at the bottom of the table.

Tables should be numbered with Roman numerals and cited consecutively in the text. Each table should be titled and typed double-spaced on a separate sheet. Units must be clearly indicated for each of the entries in the table.

Authors can submit complex tables and mathematical material as camera-ready copy. In this way, they are spared multiple, tedious proofreadings and the chance of error is reduced. Tables submitted as camera-ready copy should be typed single-spaced whenever possible and preferably submitted as 5 × 7-in. glossy prints.

Figures should be cited consecutively in the text by Arabic numerals. Legends should be typed double-spaced on a separate sheet. All figures and illustrations are to be submitted in such form as to permit photographic reproduction without retouching or redrawing. Line drawings should be professionally drafted and no larger than 8.5 × 11 in. Letters and numbers should be at least $^{3}/_{16}$ in. (4 mm) in height (Leroy lettering size 200). Glossy prints of figures properly prepared are acceptable. Illustrations in color can be accepted only if the authors defray the cost.

References should be cited in the text by an Arabic numeral in parentheses and listed at the end of the paper in numerical order typed double-spaced on a separate sheet. Abbreviations of journal titles should conform to those of *Chemical Abstracts Service Source Index*, 1985. Please note the following examples.

1. Susi, H., and Byler, D. M. (1987) *Arch. Biochem. Biophys.* **258,** 465–469.
2. Bovey, F. A., and Jelinsky, L. W. (1983) Chain Structure and Conformation of Macromolecules, p. 150, Academic Press, New York.
3. Britton, G. (1985) *in* Methods in Enzymology (Law, J. H., and Rilling, H. C., Eds.), Vol. 111, pp. 113–149, Academic Press, San Diego.

Miniprint supplements are an effective way of presenting supportive data. They are printed from plates made by photographic reduction from typed pages provided by the author. Types of data that have been published as miniprint supplements include analyses relevant to studies of amino acid or polynucleotide sequences, details of chemical syntheses, preparation of enzymes, extended statistical or mathematical discussions, and X-ray diffraction data. The miniprint supplement is published in the journal, immediately following the parent paper, and is included in the reprints. Since the miniprint supplement is produced from camera-ready copy supplied by the authors with no redaction or editorial changes it is important that the copy be letter perfect and conform to the style of the journal. *Authors will not be permitted to make changes to the miniprint supplement at the proof stage. Any changes necessary in the proof must be made as a typeset "Note added in proof."*

Proofs will be sent to the author, with a reprint order form. Authors will be charged for extensive alterations.

Reprints. Fifty reprints of each article will be provided free of charge. Additional reprints may be purchased.
